

## Senior Back-End Developer (.NET)

We are looking for a Back-end Developer to join a team of highly qualified people who are passionate about what they do. You will help us build an online gaming platform with high levels of scalability and performance, using the most advanced technologies on the market.

### Job Activities

- Developing, implementing and maintaining an online games platform, in micro services architecture, with the .NET Core framework, in a Linux environment
- Creation, maintenance and constant improvement of a continuous build process with code quality validation and automated tests
- Creating and evolving tools for the operation, analysis and optimization of the online games platform
- Development and constant evolution of our tools and internal processes to achieve our business objectives
- Contribute actively to code reviews and assist in the development of other team members
- Promote the sharing of the most advanced and innovative development methods, practices, technologies on the market through the team and other areas of the company

### Required Skill

- Experience of over 5 years with back-end development, in .NET architecture
- More than 5 years experience with C # programming language
- Experience with ASP.NET Core frameworks in Linux environment
- Experience with development of web services in micro services architecture
- Experience with MySQL databases
- Experience with unit tests
- Solid knowledge in object-oriented analysis and development
- Knowledge of Scrum and other agile methodologies

### Desired Skills

- Undergraduate degree on Computer Science or related areas
- Experience in implementing test projects
- Knowledge of versioning tools (Bitbucket, Github)
- Knowledge of Java, Python, Go or other back-end development languages
- Culture of code reuse and quality embedded throughout development
- Self-management, fast learning and good communication
- Advanced English

### What do we offer

- You will be part of a team of people passionate about what they do, building entertainment solutions for millions of people
- Work in a small and autonomous team, with the highest levels of competence and innovation, in a highly collaborative environment
- Remuneration and benefits compatible with your skills, with plenty opportunities for development and growth
